DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the species wherein the bearing surface of the insert presents a variation of transverse position according to the azimuth of the bearing, claims 1 and 2, in the reply filed on August 3, 2006 is acknowledged.
2. Claims 3-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 3, 2006.

Priority

3. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/418,283, filed on October 14, 1999.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Heath-Coleman (4,318,435) or, alternatively, Boni et al. (5,626,696).

See the protruding portions 13b of belts 13 on blocks 6 and 7 in Heath-Coleman and projecting strip 48 with transverse width smaller than outer bearing surface of portions 10 of the device in Boni et al. : the variation of transverse position according to the azimuth (transverse variation in height of outer surface) would appear to inherently generate the claimed vibrating
